

Infinite Possibilities

VISION

To be identified as the leader in innovative technologies in Sri Lanka by 2026

At BlueSkye International (Pvt) Ltd., we aim to provide innovative solutions to the Sri Lankan and global markets. In our commitment towards sustainable innovative technology, we provide products and services ranging from renewable energy solutions and environmental analytical solutions to consultancy services. Our interest is to help the industry decision makers make the best decisions to enhance the efficiency and user-friendliness of their creations. We couple best-in-the-industry products with best-in-class technology and service excellence to enhance customer experience.

Over the past five years, BlueSkye International has played a pivotal role in numerous significant projects, specialising in refrigeration, cold rooms, and air conditioning. As a trusted partner for major exporters in Sri Lanka, we have provided standard testing solutions. Our collaboration extends to leading NGOs, where we actively contribute to promoting sustainable solutions across various industries. Catering to a niche clientele, we have successfully assisted in establishing net-zero solutions for both domestic and commercial premises. Our diverse portfolio includes engagements in projects spanning Sri Lanka and the Maldives.

Embarking on the next phase, BlueSkye International is poised to take a bold leap into the future. Our conviction lies not only in our capabilities but also in the robust partnerships we have cultivated globally, forming the pillars of strength for BlueSkye. Quality takes precedence over quantity in our approach, ensuring that we consistently deliver the best to our clients. Our team of consultants, a harmonious blend, align seamlessly with our vision, enhancing our commitment to excellence. As we venture into this new chapter, we remain dedicated to exceeding expectations and setting new standards in our industry.

DIRECTORS

Angelo spent his early years in the hospitality industry, which honed his skills in people management and public relations, before spending the next 24 years in progressive roles in the solar industry representing some of the top blue-chip conglomerates. With his vast experience in solar PV, solar thermal and related sectors and considered a pioneer in the industry, he has won many awards over his long career and is certified in health safety & environment (HS&E) by BP Australia. He has been instrumental in launching many endeavors in creating practices and governance models for the solar industry in Sri Lanka. During his long stint in the industry, he has conceptualized, incorporated and launched leading brands and was the key figure in developing a number of groundbreaking projects in Sri Lankan and overseas markets. The wealth of knowledge and understanding he has in renewables along with a steadfast belief & conviction on the future energies' role in the world at large, has led him to founding of BlueSkye International.

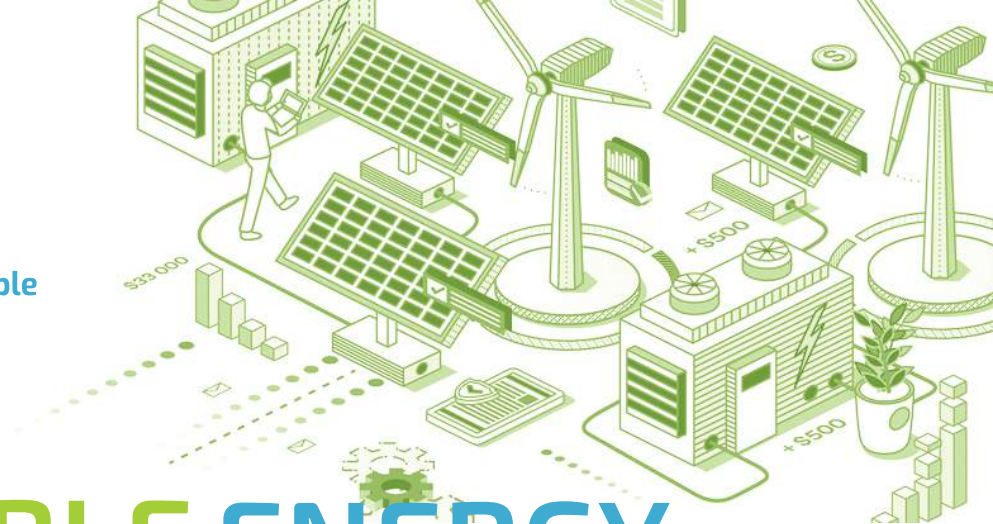

Angelo
De Silva

Christopher
Chandiram

Chris Chandiram is an MBA graduate from the University of Strathclyde in the UK with a professional background in strategic management, key account management and project management in Sri Lanka and overseas. Having worked for ten years in the Middle East exposed Chris to many cultures and working practices that has been useful to develop a sound career in management and leadership thinking. Multiple roles in business and project management have moulded Chris towards special skills in leading and managing large projects, strategic planning, crisis management, stakeholder management, problem solving, proactive thinking and achieving results in a competitive environment. He has proven his mettle time and time again, setting up companies and achieving positive results quickly with a strong work ethic, respect to the stakeholder and love for the environment. Those beliefs have been rooted in the vision of Bluesky e International and the foundation of its business strategy. Chris's positive outlook and fresh thinking is an inspiration to the BlueSkye International team and an assured comfort to their clients.

As an environment-conscious company, we offer you a comprehensive range of renewable energy products to cater to your requirement.

RENEWABLE ENERGY

Solar PV systems

Our Solar PV systems, from "grid-tied" to hybrid, incorporate the latest technology. Crafted by European design and engineering firms, our hybrid power systems ensure optimal performance. Whether it's home lighting or complex hybrid and backup systems, peripheral lighting, or energy storage, we provide tailored solutions to meet diverse requirements.

Solar Hydro Technology

SOURCE, a proud product of the USA, is the world's-first solar-powered hydro panel with applications relevant in any commercial, educational, public or private space.

Solar Water Heating systems

We offer reliable and energy-efficient hot water systems, heat exchangers, and heat pumps that are powered by cutting-edge German technology.

Solar Desalination Systems

Leveraging F CUBED's expertise and Carocell technology, we bring you an efficient and cost-effective system that generates clean drinking water from any source.

Daylight Distribution Systems

Our solution allows you to use natural sunlight to illuminate your interior spaces, whether it is in a hospital, school, office, supermarket, banquet hall, warehouse, factory or home.

Solar Water Pumping Systems

We offer reliable and energy-efficient hot water systems, heat exchangers, and heat pumps that are powered by cutting-edge German technology.

Industrial hot water, steam boilers and space heating

Perfect for critical sites, our high-performance boilers boast rapid start-up, low energy consumption, minimal maintenance, and extended service life. Tailored for heating indoor spaces in cold climates, our space heating offerings also include heat pumps utilising air, ground, water, and waste heat – ensuring efficient and clean heat creation, complemented by the ability to produce cold air for interior cooling.

BlueSkye International stands out as a premier service provider in Data Centre cooling solutions, boasting a robust customer base. Renowned for excellence in the installation and maintenance of VRF AC systems, as well as various cooling systems, we offer a comprehensive range of solutions. We also extend our services to include rapid entrance technology, as well as cutting-edge kitchen and laundry systems, ensuring a holistic engineering approach to your diverse needs.

CLIMATE CONTROL & EFFICIENT ACCESS SYSTEMS

Data Center Cooling

Efficiently cool your data center with our versatile solutions. We focus on providing precise temperature control for optimal data center performance, all while prioritising energy efficiency and sustainability. Count on us for cutting-edge solutions that cater to your data center cooling needs with precision.

Comfort Air conditioning

Premium brands meet the latest technology to give you energy-efficient, high-performing products in residential, commercial and industrial air conditioning including data centre cooling.

Coldrooms

Whether you are looking for a walk-in cold room or a large freezer warehousing complex, we offer bespoke cold rooms ranging from (-50 C° to 60 C°) created using European technology.

Refrigeration

Reliable, energy-efficient, aesthetically superior refrigerated display units such as multi-deck cabinets, freezer and chiller islands, serve-over counters, and impulse cabinets. We offer the best brands in industrial refrigeration, cooling tower and evaporative condensing technology.

Kitchen and laundry systems

We offer a range of high-quality, premium-brand products with long service life and optimum performance for commercial Kitchen and laundry needs.

Rapid entrance technology

Whether you have frequent or infrequent traffic at your warehouse / cold storage, clean room or hospital, we offer the latest technology in rapid entrance systems for commercial and industrial entrances.

Maintenance Services

BlueSkye International excels in delivering top-notch maintenance services across various categories. From ensuring optimal performance in Data Centre cooling solutions to the meticulous care of VRF AC systems and other cooling/heating systems, our skilled team guarantees reliability. Additionally, we extend our expertise to provide efficient maintenance ensuring longevity and seamless functionality across all facets of your infrastructure.

We are committed to providing cutting-edge solutions for a sustainable future. In collaboration with our esteemed global partners, we ensure top-notch environmental quality monitoring. Together, we strive to address environmental challenges with innovative solutions.

ENVIRONMENTAL SOLUTIONS

Water Analysis

Precision in water analysis. LAQUA Benchtop Meters for lab ease, LAQUA Handheld Meters for on-the-go, and LAQUAtwin Pocket Meters for quick on-site testing. Electrodes, solutions, and accessories tailored for diverse applications. Explore precision with Field Meters like Multi-parameter Checker U-50 and Oil Content Analyser OCMA-500/550.

Process & Environmental Analysis

Leader in environmental tech. Cutting-edge solutions for air, water, and soil quality. Compliance with global regulations, contributing to environmental preservation. Portfolio covers Gas, Water, Temperature, Gloss, and Radiation. Applicable across industries for a positive environmental impact.

Wood and Structural Moisture Analysis

German precision at its core. GANN's range, from handheld instruments to professional tools, reflects dedication to quality and innovation. Moisture meters for wood and structural moisture, air humidity meters, temperature devices, and flow meters. Enhancing capabilities at BlueSkye International with precision tools.

Laboratory Testing

Excellence in lab instruments. Infitek, our innovative partner, manufactures high-quality laboratory equipment. Contributing to our commitment to quality and efficiency at BlueSkye International.

At BlueSkye International, we bring Japan's finest technology to Sri Lanka, empowering industries to achieve environmental sustainability while ensuring a safer and cleaner environment for future generations. Partnering with Horiba Japan, a global leader in environmental monitoring solutions, we deliver state-of-the-art systems tailored to monitor and optimize air, water, and emissions quality as well as industrial processes.

AIR | WATER | CONTINUOUS EMISSION | PROCESS

Air Quality Monitoring Systems (AQMS)

Our AQMS solutions are designed to monitor and analyze air pollutants such as SO₂, NO_x, CO, O₃, and particulate matter. These systems play a critical role in urban air quality management, regulatory compliance, and environmental safety. Applications include industrial zones, urban centers, highways, and airports, enabling accurate and year-round environmental monitoring to protect public health.

Water Quality Monitoring Systems (WQMS)

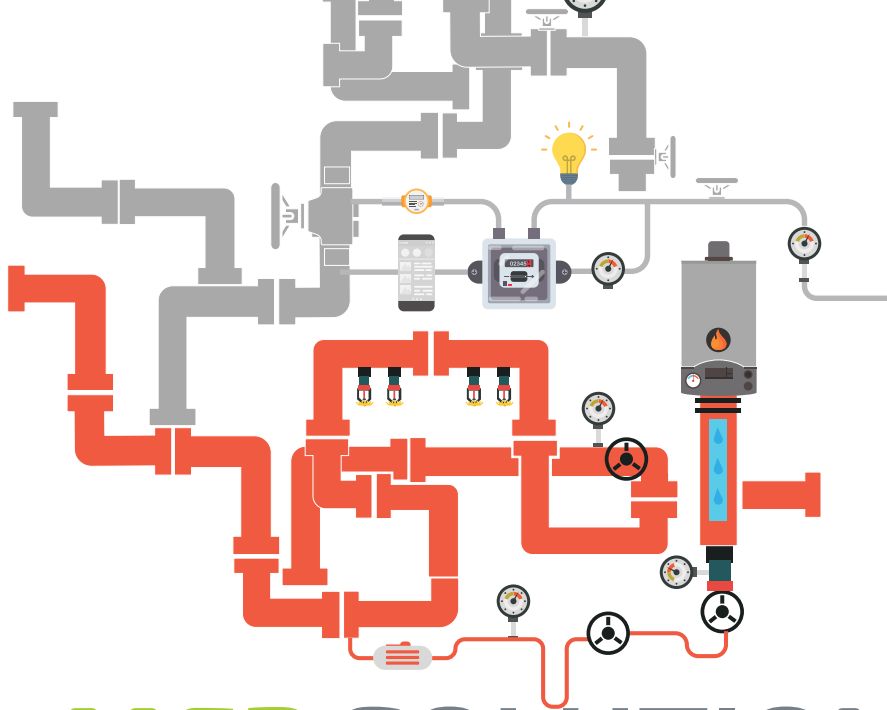

The WQMS range ensures efficient monitoring of water pollutants, including Chemical Oxygen Demand (COD), Total Phosphates (TP), and Total Nitrogen (TN). These systems are ideal for industries such as manufacturing, agriculture, and municipal water management, ensuring compliance with discharge regulations while preserving water resources.

Continuous Emission Monitoring Systems (CEMS)

Our CEMS offerings help industries monitor emissions from stationary sources, measuring pollutants like SO₂, NO_x, CO, and dust levels. Designed for use in power plants, refineries, cement factories, and chemical industries, these systems ensure compliance with environmental standards and contribute to reducing air pollution.

Process Analyzer Systems

The Process Analyzer Systems from Horiba optimize manufacturing processes by analyzing hydrocarbons and other critical parameters. These systems are instrumental in industries like petrochemicals, energy, and pharmaceuticals, driving efficiency while minimizing waste and emissions.

MEP Solutions by BlueSkye International encompass commercial lighting, fire safety, construction accessories, and water management. Experience precision, reliability, and innovation tailored to your needs for seamless integration and maximum project performance.

MEP SOLUTIONS

Commercial Lighting

BlueSkye International partners with global leaders in lighting technology to provide the best solutions for your commercial space, outdoor and indoor sports stadiums. Our designs blend energy efficiency, exceptional aesthetics, and user-focused functionality for optimal results.

Fire and Aligned Services

In collaboration with globally recognized fire safety experts, BlueSkye International offers integrated fire and life safety solutions. We provide the precise solutions in strict accordance with the latest codes, utilising world-class technology to protect your facility and its occupants.

Construction Accessories

BlueSkye International represents top-tier manufacturers of construction accessories. We streamline your MEP projects with reliable access to high-quality electrical, HVAC, and plumbing components, ensuring timely sourcing and competitive pricing.

Water Sector

BlueSkye International partners with the best in the world to bring high-tech water management solutions, including smart water meters for precise measurement. We work alongside leading innovators to provide sustainable water distribution, treatment, and wastewater systems – with an emphasis on efficiency and environmental responsibility. Our expertise lies in providing the ideal technological solution for your unique needs.

Blinds & Curtains

Elevate your interiors with our bespoke blinds and curtains. Featuring modern designs and advanced automation, our solutions deliver both elegance and convenience. Perfectly tailored to your needs, they redefine comfort and control.

Lighting Solutions

Bring your spaces to life with our advanced lighting solutions. Whether it's for homes, offices, or commercial settings, our lighting designs balance aesthetics and efficiency, creating the ideal ambiance for every moment.

Outdoor Canopies

Transform your outdoor areas with sleek and durable canopies. Engineered for style and functionality, our canopies are perfect for creating shaded, comfortable spaces in residential or commercial environments.

Heating and cooling

Experience uninterrupted hot water with our advanced solar hot water systems. Combining high performance with low energy consumption, these systems are designed to harness the power of the sun, offering an eco-friendly and cost-effective solution for modern living.

CONSULTANCY

With an aggregate experience exceeding three decades in solar, mechanical, civil, electrical, MEP, security systems, Human Resource development and Organisational development , both locally and globally, BlueSkye International is a cornerstone of expert guidance. From cutting-edge solar technology to strategic Human Resource development and MEP consultation, our seasoned professionals offer comprehensive insights that redefine sustainability and efficiency in your projects

Nilangani De Silva is an exemplary Executive Coach, holding a Professional Certified Coach (PCC) designation and specializing in Leadership Development and Culture Transformation. Her dedication to Equity, Diversity & Inclusion (EDI) is instrumental in creating inclusive workplaces, evident in her impressive track record of implementing effective strategies.

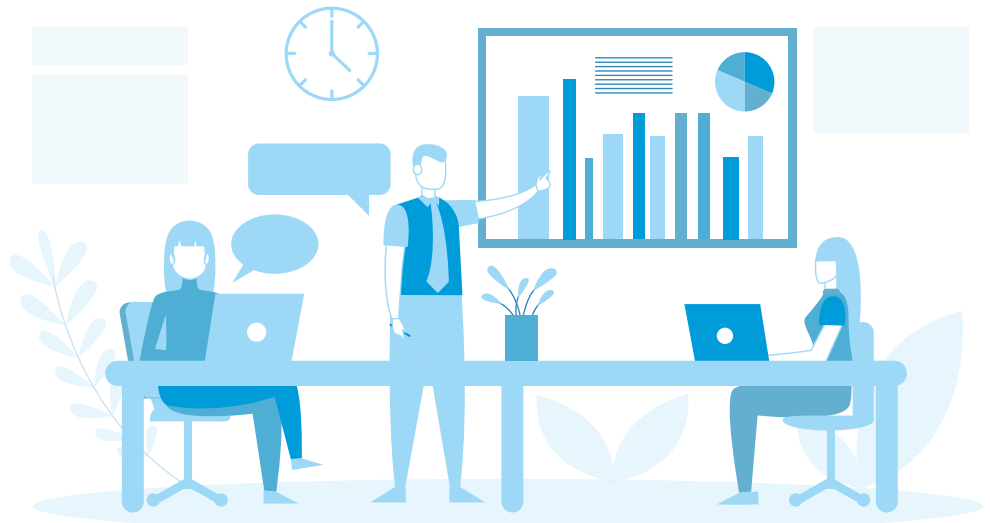

Nilangani's approach is comprehensive and adaptable, blending tailored strategies, extensive training programs, and data-driven insights to drive organizational success. Beyond individual growth, she actively supports managers and supervisors in becoming influential leaders, guiding them through personalized coaching sessions to maximize their potential and overcome challenges.

Moreover, Nilangani fosters a culture of excellence within teams by leveraging her expertise to develop key skills and promote collaboration. Her holistic approach to executive coaching, coupled with her unwavering commitment to diversity, inclusion, and organizational excellence, establishes her as a valuable asset to any team or organization fortunate enough to benefit from her expertise.

Amal de Mel |

Amal de Mel is a well recognised personality in the Mechanical, Electrical, and Plumbing (MEP) industry. Renowned for his expertise, Amal is well-versed in the latest technologies and maintains extensive global connections. Known for his commitment to delivering on promises, his illustrious career spans over three decades, marked by the successful execution of landmark projects in the water, construction, and power sectors. His invaluable contributions include providing solutions and equipment to critical infrastructure projects, particularly for government initiatives. With a wealth of experience, Amal de Mel stands as a cornerstone of excellence within BlueSkye International.

At BlueSkye International, Amal envisions establishing a premier one-stop sourcing hub in water supply and irrigation management. With a focus on delivering state-of-the-art equipment sourced from globally authorised MEP industry manufacturers, Amal leverages his extensive knowledge in the water sector. His expertise spans the water & drainage sectors, as well as lighting and other critical infrastructure areas, providing tailored solutions for comprehensive project development.
